Restoration Physical Therapy Services in Media PA

At Restoration Physical Therapy in Media, PA, our team of experienced and licensed physical therapists work to provide effective, evidence-based care to patients impacted by disorders of the bones, muscles, joints, ligaments, tendons, nerves and skin.

Using both hands-on therapy and a variety of specialized treatments and modalities, we work to immediately reduce swelling and eliminate pain, and then proceed to help with the healing and rehabilitation process.

The musculoskeletal system is made up of both soft and hard connective tissues that maintain the structural integrity and stable mobility of the body.

Our orthopedic physical therapy services are focused on both diagnosing, managing and treating disorders and injuries of the musculoskeletal system and the rehabilitation of patients who have had orthopedic surgery.
